EXPERIENCES

Full Stack JavaScript Developer

Agência 56k, Sep/2018 – Present

- Agência 56k is a telephone solution company, working with system development too. I develop a communication system, tracking and soon transport control, between driver and company. this system integrates a mobile app created in React Native, using some APIs like geolocation, push notifications, among others, a backend using Node JS and MongoDB for database, hosted in google cloud, using cloud bucket API, speech API, and a dashboard written in VueJS. To connect all these using http and socket protocols. Through this system entered new customers for training, purchase and use of this system. Beyond this system, i created an proxy in NodeJS to centralize all the services that the company offers, avoiding multiple open ports and / or subdomains for each service, the services are not exposed on the Internet, receiving external connections by the proxy.

Mobile Developer

Ong Anjos de Rua - Taquaritinga, Apr/2017 – Jun/2018

- Anjos de rua is an NGO that rescues pet animals at risk and take care of them like food and looking for a new sweet home. In addition they also do castration at low cost, pay for treatment of sick animals, campaign of animal donation and they campaign for money. In university we do a Volunteer work in this NGO, working to create a system to help them to work better. Like an website to help in campaigns, an mobile app to help in conversation between a member and a animal owner. I was responsible for the development of the mobile application.

EDUCATION
